

GF-RP48 & RP-48 Mouse RP48/Pushbutton Panel Cockpit Control Module

Congratulations on your purchase of the GoFlight **GF-RP48 Rotary/Pushbutton Panel Module**, part of the extensive Family of GoFlight Cockpit Control System modules. The GF-RP48 is designed to operate with a wide variety of aircraft and is sure to make your flight

simulation experience more realistic and enjoyable. The steps below will assist in the installation, configuration, and operation of the GF-RP48. Following these instructions will help to get you up in the “virtual skies” as quickly as possible.

NOTE: *If you own other GoFlight hardware and have already installed the most current version of software on your system, you do not need to install the software again. Simply skip the software installation steps in the instructions below.*

Installing the GF-48 Rotary/Pushbutton Panel Module

1. Get on line and go to <http://www.goflightinc.com>.
2. On the home page click *Support*.
3. Click on “GF Config x.xx” to download our latest module drivers and configuration software.
4. Click “Run” or “Save” and follow the instructions to install the software. If the software installer detects that GoFlight software is already installed on your system, it will prompt you to overwrite. Click the **Yes** button to overwrite the existing version of GoFlight software. This is useful if you wish to keep the configuration settings for other GoFlight modules installed on your system. However, you should first make sure that the software you are overwriting is an older version and not a newer one.
5. If you are going to mount the GF-RP48 module into a GoFlight rack, install the module in any desired location in the rack using the thumbscrews provided.

NOTE: *When tightening the GF-RP48 mounting thumb screws, be careful not to over-tighten the screws as it is possible to strip the threads in the mounting holes or break the mounting screws if excessive force is applied.*

Button #7 med Mouse speed
Button #8 slow Mouse speed
Rotary #1 moves your mouse Right and Left.
Rotary #2 moves your mouse Up and Down.
Rotary #3 moves your mouse at a Left angle.
Rotary #4 moves your mouse at a Right angle.

TO change back to RP-48 Mode hit the center two buttons again.

GF-RP48 Warranty

This product is warranted to the original purchaser to be free from defects in materials and workmanship for a period of one (1) year from the date of purchase. During this warranty period, GoFlight Technologies, Inc. ® (“GoFlight”) will, at its option, repair or replace, at no charge, any component determined to be defective. The liability under this warranty is limited to the repair and/or replacement of the defect or defective part, and does not include shipping expenses. This warranty does not apply if, in the determination of GoFlight, this product has been damaged by accident, abuse, improper usage, or as a result of service or modification by anyone other than GoFlight.

NO OTHER WARRANTIES ARE EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTIES OF SALABILITY AND FITNESS FOR A PARTICULAR PURPOSE. GOFLIGHT TECHNOLOGIES, INC. IS NOT RESPONSIBLE FOR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
